Purpose of the "Lists" Sheet

This sheet acts as a **central reference hub** for all the dropdowns, lookups, and standardized values used across the workbook.

By keeping all reference data in one place, we make the file easier to maintain, update, and error-proof.

What We Did Here:

- Created **master lists** for Customer Names, Product Names, and related details.
- Used these lists to populate dropdowns in the Invoice sheet, ensuring **consistent data entry** (no typos or mismatched names).
- Stored essential lookup values like Product Price, Customer Contact, and Product Category for **automatic data retrieval**.
- Applied **VLOOKUP formulas** in the Invoice sheet that pull data from here, so if anything changes (e.g., a product price), it automatically updates everywhere.
